Enjoy the perfect outdoor environment every day with Vergola - **an investment in better living.**

From improving an entertaining area to creating a feature walkway, Vergola is the best choice for a wide range of applications.

delivering innovation
in outdoor living

vergola features

Vergola is a fully adjustable louvre roofing system. It maximises the use of your outdoor area by giving you control over your environment - control your sunlight, shade and ventilation to suit you.

Variable light and shade

Enjoy variable light, full shade or diffused light by adjusting the position of the louvres. Control the amount of sunlight and shade for a perfect outdoor environment.

Electronic Operation

The remote control (or keychain remote) allows you to open and close your Vergola at the touch of a button - from wherever you are.

Rain Protection

When closed, your Vergola is completely rainproof (in general weather conditions.) In addition, state of the art rain sensors close the Vergola automatically upon rain, ensuring your outdoor area remains dry. When the rain has ceased, the Vergola automatically re-opens.

Guaranteed Quality

Vergolas are produced with quality components, and are manufactured to resist cyclone force winds. They are available in a diverse range of colours in Bluescope Colorbond steel, Aluminium or Zinalume.

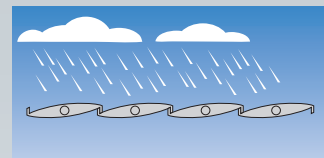

Air Flow Control

The aerofoil louvre shape allows air flow and ventilation to be controlled in wet and dry weather. Let in a cool breeze, or allow warm air to escape.

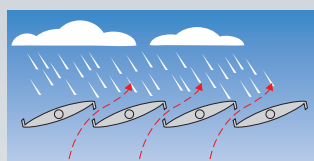

Energy Efficient

Vergola assists in reducing heating and cooling costs by shielding exterior walls and windows. The superior double skinned louvres also provide both thermal insulation and sound reduction.

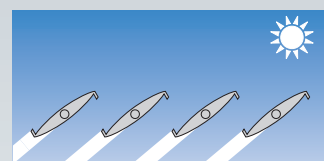

The Vergola adjustable louvre roofing system can be positioned as shown, or any point in between.

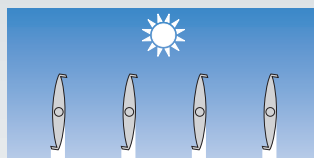

Closed for heavy rain

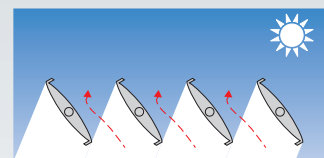

Ventilation with rain proofing

All available sun

Maximum overhead sun

Maximum shade with ventilation

creating custom
outdoor environments

design flexibility

Vergola's professional team individually designs each Vergola - we'll provide multiple ideas and options, working with you to create a perfect solution.

From design to construction all Vergolas are built to enhance and blend with the style and character of the building. In addition, optional features can be included to improve your Vergola - from downlighting and extra remote controls, to wind sensors, self-timers and fire alarm compatibility.

Vergolas are manufactured using your choice of either Colorbond steel, Aluminium or Zinalume. Colorbond and Aluminium are available in a wide range of colours, while Zinalume has it's own distinct silver aesthetic.

The framework of the Vergola can be constructed from timber, steel or aluminium.

From concept to completion, all Vergolas can be created to match the existing property; we'll ensure everything is accurate, from the colour of the paint to the construction of matching pillars and supports.

Specially designed Vergola gutters are fitted along the inside perimeter of the framework, handling run-off water efficiently while remaining concealed. All Vergolas are fitted with watertight storm seals as a standard inclusion.

The configuration of the Vergola opening roof system is varied - from Curved Barrel Vaults, to Pitched, Gable, A-Frame, Freestanding and more.

Vergola is also available as a fixed or adjustable vertical screen. Available in electronic or manual operation, Vergola screens are a perfect way to provide privacy and shade for indoor areas.

the vergola difference

understanding and building
better outdoor living

From the innovation and quality of our products, to the creation of custom outdoor spaces, Vergola understands and builds better outdoor living. Our goal is to create the perfect outdoor living environment for you.

Vergola manage the design and installation process from start to finish. This includes custom design, statutory and council approvals, and ongoing maintenance and enquiries.

The installation process is managed and completed by our qualified personnel to ensure minimal interruption and timely construction. All products are tested to AS1170.2 and carry the manufacturer's warranty.

An unconditional two year warranty, workmanship guarantee and on-call maintenance ensure your peace of mind. Vergola - any other roof is a compromise.

With Vergola, you can transform your outdoor area into the most versatile and livable part of your home.
